

# KEEP IT COOL FROM FARM TO FRIDGE

STOP BACTERIA FROM GROWING TO  
PREVENT FOODBORNE ILLNESS

To prevent bacteria from growing, control the:

1. **TEMPERATURE** of your food, and
2. **TIME** food spends outside of a safe temperature zone.

Foods susceptible to bacteria growth should not be in the temperature danger zone (41°F – 135°F) for more than 4 hours.

FOCUS ON KEEPING THESE FOODS SAFE FROM  
THE FARMERS MARKET TO THE FRIDGE:

Meat • Eggs • Fish • Dairy products including cheese • Raw sprouts  
Cut leafy greens • Cut garlic in oil • Sliced melons • Sliced tomatoes  
Prepared items made with any of these ingredients (excluding canned goods)

BACTERIA NEED THREE  
THINGS TO GROW:

Materials are supported by a Food Safety Training and Education Grant through the Michigan Department of Agriculture and Rural Development. Produced by the Michigan Farmers Market Association. Learn more at [mifma.org](http://mifma.org).
